

Figure 8. Nominal positions of Zones I-V

Note 1.— Dotted lines indicate zone boundaries whose positions are not fixed, enabling Issuing States or organizations flexibility in the presentation of data. See paragraph 3.3.

Note 2.— Zone VI, where used, appears on the back of the data page or on an adjacent page.

Zone III should start at the right vertical boundary of Zone V and may extend, at the discretion of the Issuing State or organization, to the right edge of the MRP data page. Figures 9 and 10 illustrate the flexibility permitted to Issuing States or organizations.

If Zone IV is placed on the MRP data page, it shall be at the bottom of the VIZ on the front of the MRP data page, its lower boundary coincident with the top edge of the MRZ. Figures 8 and 9 show two alternative positions for Zone IV. Figure 10 shows an MRP data page where Zone IV has been placed on an adjacent page.

Zone IV may also overlay Zone V, though this practice is not recommended. In this case, Issuing States or organizations shall ensure that individual details contained in either zone are not obscured. See Appendix A, Figure 13.

When an Issuing State or organization wishes to have a displayed image of an MRP holder's fingerprint, the image may be displayed within the area designated for Zone II as illustrated in Appendix A, Figure 14.

Note 1.—To allow for variations during manufacture of the MRP, a tolerance of ± 1.0 mm (± 0.04 in) is allowed for the 23.2 mm (0.91 in) dimension of the MRZ and within that overall tolerance the boundary between the VIZ and the MRZ shall not be skewed more than 0.5 mm (0.02 in) over the 125.0 mm (4.92 in) dimension.

Note 4.—The borderlines of the fields shall be omitted on the actual MRP data page.
